

Chick Scale 103

Portable
Accurate
Farm Ready Poultry Weighing

Reliability

Smart Weighing for Modern Poultry Farms

The **ChickScale 103** is a compact and affordable weighing solution designed specifically for poultry operations. Built for mobility and ease of use, it operates on long lasting rechargeable batteries, providing up to 8 hours of continuous performance in the field.

Essential Flock Data at Your Fingertips

Every bird hung on the scale is measured individually, and the ChickScale 103 automatically generates vital flock insights:

- Average bird weight, standard deviation, and coefficient of variation (CV)
- Total number of birds weighed
- Histogram in 25 g increments, covering ± 1 kg around the average weight
- These high quality data points help farmers monitor flock uniformity, track performance trends, and make informed management decisions.

Efficient Storage & Easy Data Management

The **ChickScale 103** includes internal memory to store up to 9 batches, allowing farmers to maintain

organized, historical records directly on the device. For deeper analysis, reports can be downloaded to any PC using the included software-perfect for farm management systems and long term documentation.

Technical specification

Maximum Weight Capacity: 15 Kg

Precision: ± 5 gr

Display: 4 digit LED Power & Connectivity

Power Supply: 220V or rechargeable batteries

Operating Time: Up to 12 hours (with batteries)

Optional USB Output: PC connectivity for data transfer

Designed for Today's Poultry Professional

Whether you're managing broilers, breeders, or pullets, the **ChickScale 103** provides reliable performance and precise data to support better decision making and improved flock results.
