

Image III

Used for:
Broilers, Breeders, Layers

The Image III All-in-One Controller is the most flexible and robust system for modern poultry management. Combining smart technology with a simple, easy-to-use interface, it's engineered to efficiently handle all your housing needs and deliver reliable performance for the long term.

Reliability

Image III has large 7", use friendly color touch display. Its modular design features an expandable relay box that supports sets of 8 relay output modules, giving you the power to configure a system with up to 64 relays.

Technical information

Image III includes 6 analog 0 to 10 Volt outputs for control of variable speed fans, heating, flap control and light dimming.

Remote access

Image III is engineered to give you peace of mind, with simple remote control via Web, SMS, Smartphone or Tablet.

Typical Applications

The all-inclusive controller provides a complete management solution, covering: Full Climate Control, Feed Management (Silo and Batch Weighing), Automated Bird Weighing and Egg Counting. The Image III is built to scale with your operation. All

growing period data is automatically stored and can be displayed instantly in graphic format on the color touch-screen. Data transfer and system updates are simple using the accessible front USB port. Complete Functional Flexibility: Suitable for broilers, pullets, breeders, layers, and swine, the controller provides precise management of all house functions, including variable speed fans, light dimming, static pressure, humidity and more. Temperature reduction and weight curves are standard inclusions.

Technical specification

Power 220 Volt

5 Analog inputs

20 Digital inputs

6 Analog outputs 0 to 10 volt

2 Inputs for 4 silo weigher or 1 batch weigher

4 inputs for bird weigher

Dry change over contact relays 220V/2A

Expandable with module of 8 relays up to 64 relays

Temperature measurement of 0.1C
