

# SpeedTronic 506 10A/20A

Easy to operate and install.

## Reliability

The **SpeedTronic SP-506** is a stand-alone fan speed regulator and light dimmer.

It comes in two models: phase 10 Amps 50/60 Hz.

The **SpeedTronic SP-506** continuously measures load current. An alarm is activated in case the output drops during operation.
