

# Static Pressure STP200

Easy to operate and install.

## Reliability

The **STP200** is a highly sensitive static pressure sensor that can be connected to AgroLogic's climate control units. It features a built-in digital display showing the current pressure reading.

## Technical specification

100 Pascal

10.19 mmwc

Input voltage: 12-28V DC

Output voltage: 0-10V DC

Consumption: 25mA

Pressure range: 0-1mBar

Accuracy:  $\pm 2\%$
