

Temp Sensor V.3

Easy to operate and install.

Reliability

Our advanced temperature sensors are designed to seamlessly integrate with Agrologic controllers, ensuring accurate and consistent temperature measurements for critical agricultural processes. With robust engineering and high-quality components, these sensors deliver dependable performance, helping you protect crops, livestock, and equipment.

Key Features

- **NTC 6.8 ohm Technology:** Ensures stable and repeatable readings across diverse environments.
- **Input Voltage:** Operates efficiently at 5VDC, compatible with standard Agrologic controller systems.
- **High Accuracy:** $\pm 0.2^{\circ}\text{C}$ (at temperature range of 0.0°C to 70.0°C), providing precise monitoring for sensitive applications.
- **Wide Temperature Range:** Suitable for greenhouse climate control, feed storage, and livestock management.
- **Easy Installation:** Compact design and simple wiring for quick integration into your existing setups.
