

Vision 24S

The future is here!

In today's demanding market, efficiency, maximum performance and minimum costs are a must for success.

Agrologic is a leader in the climate control field and we have the experience needed to assist the grower in meeting these demands.

The well-known, field proven Vision controller is back in a new freshly designed, advance model.

The **Vision 24S** helps you control all your house inputs/outputs using only one controller.

Inputs

- Temperature sensors.
- Humidity sensors.
- CO2 sensors.
- Pressure sensors.
- Water meter.
- Feed counting.
- Feed silo weighting.
- Batch feeder.
- Egg counters.
- Bird scales.
- Potentiometer.

Technical information

- Suitable for Broilers, Breeders and Layers.
- Easy to use friendly user interface.
- Large graphic LCD display.
- Suitable for all types of ventilation systems.
