

## ACCUCOUNT EGG COUNTERS

### ACCUCOUNT N SERIES

The N series Accucount is the most accurate egg counter on the market today.

It was designed to be installed on egg belts and conveyors up to 100 cm wide.

The N series can be ordered in five sizes: N20 - 20 cm, N30 - 30 cm, N50 - 50 cm, N75- 75 cm and N100- 100 cm.

Our patent counter counts all eggs passing under it.

The Accucount N series counter puts out a pulse for each egg counted.

### ACCUCOUNT MARK 5

The Accucount Mark 5 infra-red egg counter is a precise electronic two-dimensional egg counter developed to count eggs on egg collection belts and conveyers.

Mark 5 and N series put out a 50 m.sec pulse for each egg counted.

Both the Mark 5 and N series can be connected to the Agrologic ECM12 or Image II controllers to display and log all eggs counted.

#### TECHNICAL DETAILS:

Power supply of 12 VAC.  
Output count pulse 50 m.sec  
for each counted egg.

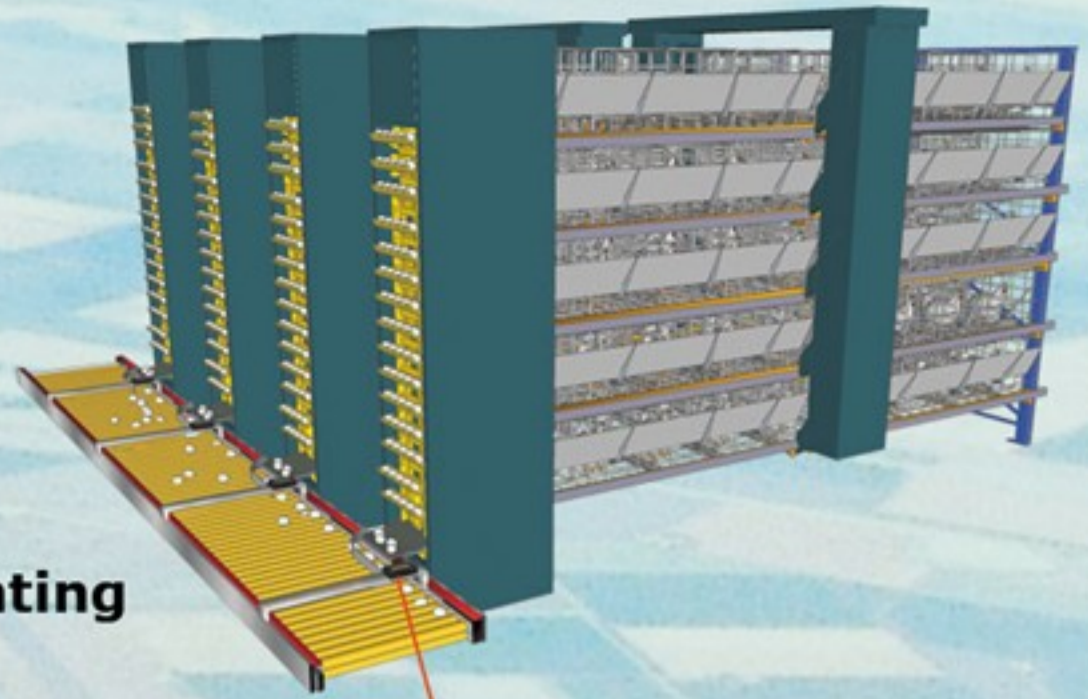

#### TECHNICAL DETAILS:

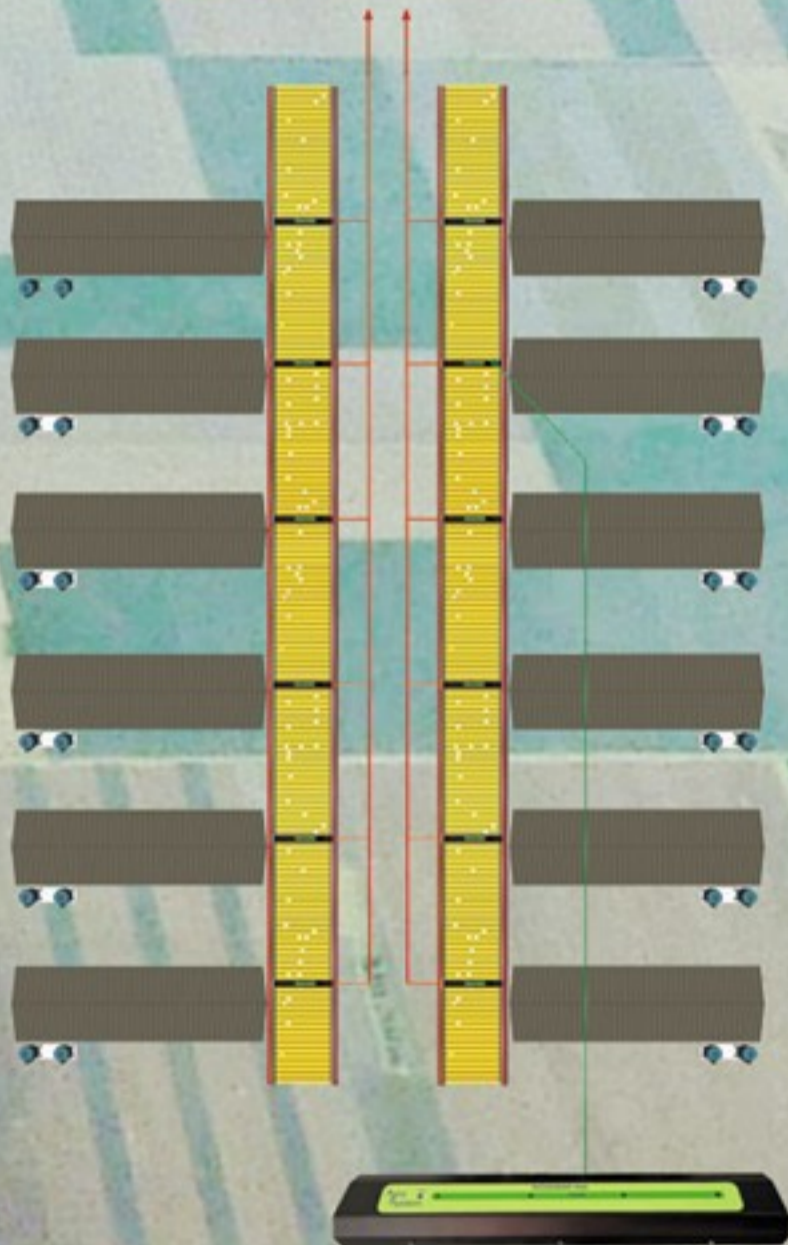

Counting area 10 cm.  
Power supply 12 VAC.  
Output count pulse 50 m.sec  
for each egg.

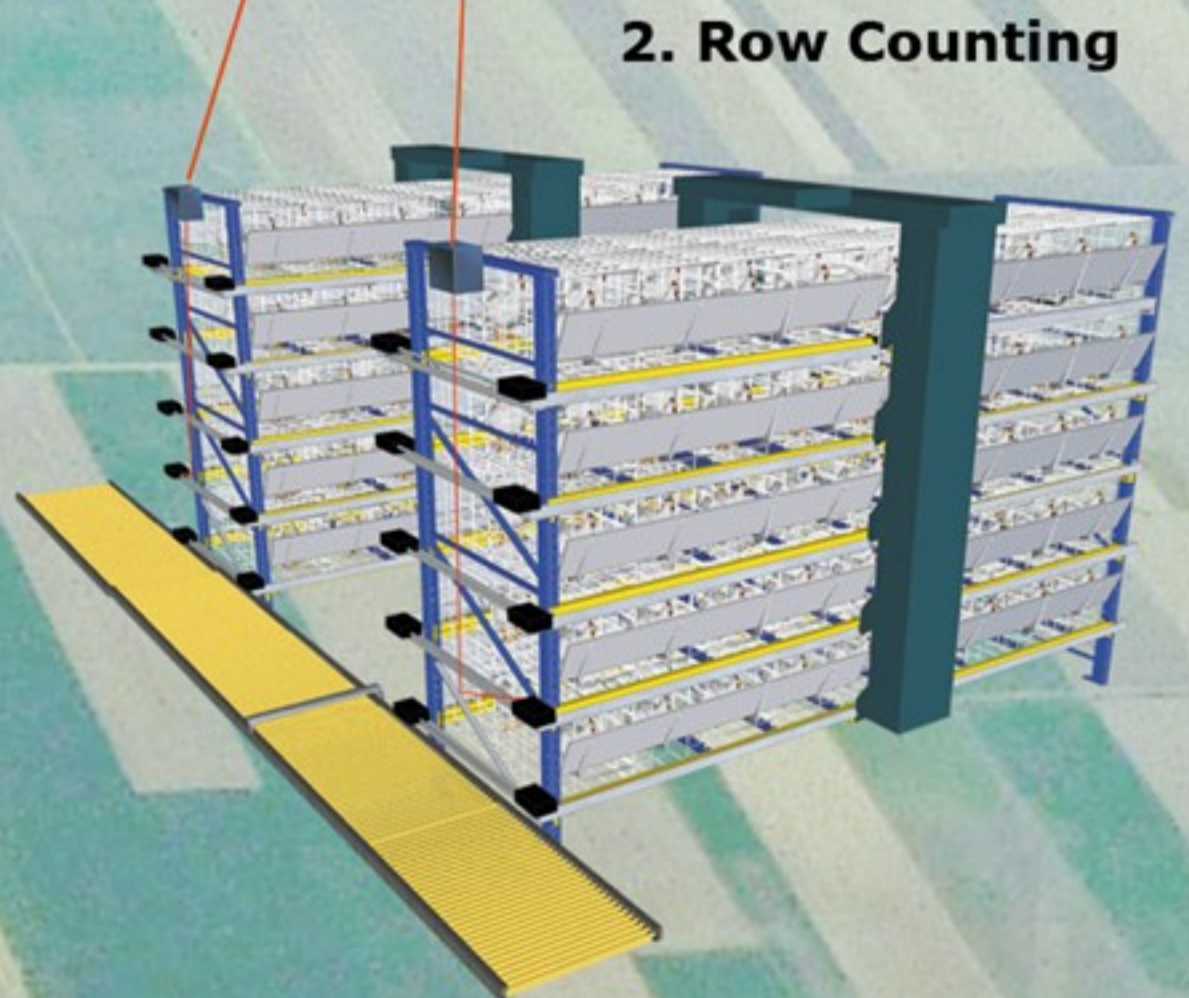

# CONNECTION OPTIONS

**1. Tier Counting**

**3. Multiple Layer House Connection**

**2. Row Counting**
