

Friendly, Advanced, Affordable

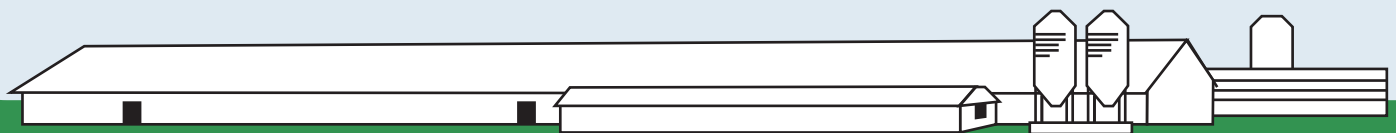

DCS Agrologic Gateway

The future is here!

- The Agrologic **DCS** Gateway is a standalone advanced communication server.
- The **DCS** stores all controller data which can then be recalled using the Agrologic WebChick Pro program, downloaded to a computer, and exported to an ERP program.
- When used together with the Agrologic internet based WebChick Pro program, the **DCS** allows complete access to your Agrologic controllers for complete monitoring and control 24/7 from anywhere in the world.
- Access to the **DCS** can be done from any internet connected computer, tablet or smartphone.
- Using a web browser, the Agrologic WebChick Pro program allows access to all controllers for complete monitoring and control.
- The WebChick Pro main screen can be customized by the user to display only the information he needs.
- The WebChick Pro control screens are exactly the same as you see in the controller for a user-friendly experience.
- User friendly configurable graphs and complete history can be displayed in the WebChick Pro program.

Technical Specifications:

OS	Linux	Operation Temperature	0-55
Interfaces	4 X RS485 ports, 4G Modem, Lan 10/100 , USB 2.0, WIFI (Not included)	Length	150 mm
Display	5-inch, capacitive touch	Width	35 mm
Power Supply	12VDC 2A	Hight	100 mm
		Weight	600 g
